

# Egg Drop Challenge Monologue

Has your teacher assigned the egg drop challenge yet?  
Have you tried it just for fun?  
Do you know what I'm talking about?

## The Science!

**The Egg Drop Challenge** is a fun science experiment where you take a raw egg and design something for the egg to protect the egg from a long drop, like a balcony or 2nd floor window. The trick is:

- You can only use materials from your house/apartment (Make sure you get permission first).
- You need to draw a plan of what you want it to look like.
- If you've already done something like this you're ahead of the game!
- If you haven't already done this, you probably will and you'll be ahead of the game then!

## The Drama!

Can you imagine what this egg character is thinking or feeling before they get launched off your stairs? Are they feeling brave or scared? Did they volunteer for this like an astronaut?

[Click this link to watch a short example video](#)

Before you launch our egg friend, draw what their face on the egg that show how they are feeling.

Write down or video yourself giving the speech this character would give before the launch.

Whether or not it is successful, write or give a speech **AFTER** the launch. Has their feeling changed? If so, how would that affect their what they say in their speech?
